

What is Easy Locator?

Easy Locator is a web application designed for businesses to let customers locate their branches and outlets worldwide, especially the ones located nearby a customer. Easy Locator, a website store locator and much more, helps your business get detected far more easily than ever before as now potential customers can easily know where your business is located-whether near a customer or far. And even if your service is at a little distance from the physical presence of a customer, they can at least have a clear idea of the location with the help of Easy Locator. The idea, also portrayed through <http://www.easylocator.net/>, is to give you extra leverage in a competitive market by not letting your customers lose you and go to others just because they couldn't know the location of your business.

Have you been losing even potential customers just because you were unable to guide them quickly to get to the nearest business by you? Have you been feeling the need for easy-to-use store locator software? Were your chances of business growth hampered merely because you couldn't make the presence of your business branches felt and get detected online? Well, worry not as Easy Locator seems to have come up with the right solution by being a zip code locator, website store locator and whatnot.

Easy Locator is yet another leap forward in the online marketing world. It is a store locator software which enables you to add a store locator, service locator or [Dealer Locator](#) option to your website enhancing customer convenience. With the help of Easy Locator, your customers can detect your zip code, state, city, street address or exact landmark. So, the software is not just a dealer locator or zip code locator rather it is much more as it also pinpoints the precise location of your business, service or branch. Are you wondering how Easy Locator works? Well, it's very easy to understand the functions of this application. What you need to do is just add Easy Locator to your website and the visitors can use its options to locate you. Once added to your website, you can customize Easy Locator to facilitate your customers the way you want to. If you own a chain of stores, the software can work for you as a store locator software and if you are a professional, dealing in a field, you can use Easy Locator to your advantage by turning it into a dealer locator software. You can modify, arrange and organize Easy Locator's options and features to suit your needs.

Easy Locator is claimed to be a product of professionalism and care for customers like you who would like to guide your online visitors to your location near them. Check out the official website of Easy Locator <http://www.easylocator.net/> to know how the application works. The manufacturers of this application boast simplicity and organization of its interface. They appear

to have offered you a solution to the complex and lengthy problem of letting your customers find your business near them. The users can use Easy Locator conveniently without finding it hard to understand the options the software has.
